Experience

Staff Product Designer Revery (Google Gemini)

Mar 2026 – May 2026

I collaborated with Google's Gemini Applied AI team (via Revery) on a short-term engagement focused on next-generation AI experiences. The work was conducted under NDA, so I'm only able to share limited details publicly.

Staff Product Designer Block (Square/Cash App)

Apr 2024 – Feb 2026

I led the transformation of Square Online checkout from individual product experiences into a shared commerce platform, creating common foundations that scaled across multiple products while maintaining a consistent bar for trust, quality, and accessibility. I later led the Cash App Ordering Profiles Checkout experience across iOS, Android, and Web.

- **Checkout Platform:** Defined the shared platform architecture and operating model balancing platform consistency with product-specific flexibility across Square Online commerce.
- **OOFE:** Led late funnel buyer experience (Cart, Checkout, Order Confirmation) for Online Ordering for Everyone, improving conversion by ~20%.
- **Cash App Ordering Profiles:** Led the 0→1 checkout experience across iOS, Android, and Web for Cash App's new neighborhood based commerce platform.
- **AI-Powered Vision:** Led the buyer component of a new AI-powered Square Online website building experience.

Senior Product Designer Meta

May 2021 – Apr 2024

I led product design across Meta Commerce, spanning flagship shopping experiences, machine learning-powered recommendations, and 0→1 creator monetization capabilities, giving me experience across both mature products and new platform investments. Promoted from L4 to L5 in under a year.

- **Commerce Cart:** Led Meta Shops Cart across Facebook and Instagram, evolving one of Meta Commerce's highest-impact growth surfaces from isolated experiments to a governed experimentation model that scaled product quality alongside business performance.
- **Commerce Relevance:** Created strategy around ML-derived signals from the Meta Social Commerce Graph and integrated into Facebook & Instagram shopping surfaces.
- **Creators-as-Marketers:** Built 0→1 analytics & payments platform for creator-driven ROAS visibility.

Product Designer Ogilvy

Jan 2019 – May 2021

I designed for global enterprise clients across web, voice and email, with a focus on accessibility and CX strategy. I also served as Community Manager for Global XD.

- **IBM & Wimbledon:** Interactive parallax mini-site (UX & Interaction design).
- **Formula 1:** Alexa voice experience, CX journey mapping, accessibility reviews.
- **Nestlé / British Airways:** Email decision engineering.
- **American Express:** Airport lounge directory UX.
- **Ford:** Ran user testing for Ford's Mach-E website launch.

Product Designer Drover

Sep 2016 – Dec 2018

I owned UX end-to-end at an early-stage mobility startup, building both the product and the design culture from scratch.

- **B2C Product Launch:** Led UX from conception to launch. ~2,000 concurrent bookings, usability score 70+.
- **Design System:** Built using Atomic Design principles with Sketch shared libraries and Zeplin handoff.
- **Design Culture:** Mentored junior designers, started the "Design Book Club" initiative.

Summary

I'm an entrepreneurial product designer and former Product Manager with 10+ years of experience building products for startups, agencies and global technology companies. I enjoy solving complex product challenges by bringing together user needs, business strategy, and technology through thoughtful product thinking, systems design, and collaboration.
